[Event – Slides, Source Code And Links Used On The Hololens To 2D Developers event](#)

The screenshot displays the PIX GPU debugging interface. At the top, the title bar reads "GPU 1.pix3\* - PIX". The main window is divided into several sections:

- Events:** A table listing GPU events with columns for Queue ID, Name, and Global ID. The events shown are:

Queue ID	Name	Global ID
3,232	ClearUnorderedAccessViewFloat(...,res#6,obj#40,...,0,nullptr) {t	2,058
3,233	DispatchRays(obj#1154,...) {this->ID3D12CommandListRaytracingPrc	2,059
3,234	ResourceBarrier(2,...) {this->ID3D12GraphicsCommandList obj#15}	2,060
3,235	CopyResource(obj#30,obj#40) {this->ID3D12GraphicsCommandList obj	2,061
3,236	ResourceBarrier(1,...) {this->ID3D12GraphicsCommandList obj#15}	2,062
3,237	ResourceBarrier(3,...) {this->ID3D12GraphicsCommandList obj#15}	2,063
- Pipeline:** A section showing the current pipeline state. It includes a filter box, a "Global ID = 2059" indicator, and buttons for "Refresh" and "Show Resource History".
- 3D View:** A wireframe rendering of a 3D scene. The primitive type is "TRIANGLELIST" and the index count is "764211". The view shows a complex structure with many white lines.
- Resource List:** A list of resources used in the pipeline, including "CBV 0 : SceneConstantBuffer", "SRV 5 : scene", and "UAV Texture 1 : m\_rtOutput : I".
- HitGroups:** Two hitgroups are listed, each with its own set of resources and samplers.
